DETAILED ACTION

Claim Objections

Claim 1 is objected to because of the following informalities: In line 3 of the claim the examiner suggests inserting -- a -- before "connection layer" to correct a grammatical error. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Amano et al. (U.S. Patent Appl. 2002/0044396).

Amano et al. discloses a method for manufacturing MTJ cell of MRAM comprising: forming a metal layer (201) for connection layer connected semiconductor substrate through lower insulating layer (see [0106]); forming a pinned magnetic layer (204a) on the metal layer; physically impacting surface of the pinned magnetic layer with an atom to form an amorphous layer thereon (see [0111]); sequentially forming a tunneling barrier layer (206), a free magnetic layer (207) and MTJ capping layer (209) the amorphous layer; and patterning MTJ capping layer, free magnetic layer, the

tunneling barrier layer, amorphous layer and the pinned magnetic layer using a MTJ cell mask form a MTJ cell (see [0070]).

Amano et al. also discloses the method wherein the atom is selected from the group consisting of P or As (see [0111]).
